Database Subscriptions

MLCI is a membership organization dedicated to providing the best library products to our members at the best prices available. The database licensing program is open to all members and offers significant savings in cost and staff time.

MLCI brings opportunities to libraries in a variety of ways:

- We arrange trials and provide product descriptions and details on our website.
- We negotiate on your behalf with publishers to get the best subscription price.
- We coordinate group purchases: substantial savings can best be achieved when a group of libraries is interested in the same reference database. Groups can be as small as 2 or 3 libraries, depending on the database, or as large as province-wide.
- We cooperate with library consortia in other provinces and across the country to negotiate nationwide deals for the best pricing and terms. As a member of Consortia Canada, MLCI helps libraries get the best price on nationally aggregated deals, such as Britannica Online and the Oxford English Dictionary.
- We facilitate special publisher offers.
- We disseminate information about databases, including information about demonstrations and training, through our web page and listserv.

New subscribers are always welcome, at any time during the subscription year. Please contact the [MLCI Licensing Coordinator](#) for information about pricing or to request a free trail.

Current Selection of Electronic Resources

EBSCO CORE PACKAGE

MLCI licenses a “Core Package” of EBSCOhost databases at discounted pricing for member libraries. Libraries subscribing to the “Core Package” are eligible to subscribe to any other EBSCO database of their choice at MLCI discounted prices.

EBSCO offers special, discounted pricing if an entire school division subscribes to either the “Full Core” or the “Main File”. The Main File is a smaller version of the Full Core. It has the same 5 databases but the most expensive titles have been removed, making it a more affordable alternative. Title Lists are available upon request.
